

Измерительное оборудование для ВОЛС

Рефлектометры оптические

Предназначены для измерения распределенного затухания волокон оптических кабелей. Используются при паспортизации ВОЛС и для определения мест повреждений оптических кабелей.

Anritsu MW9076

Точные и быстрые портативные рефлектометры семейства MW9076 с высокими техническими характеристиками имеют возможность измерения хроматической дисперсии с одного конца линии.

Основные характеристики:

- большой динамический диапазон – до 45 дБ;
- короткая зона нечувствительности – 1,6/8 м;
- четыре длины волн: 1310, 1450, 1550, 1625 нм;
- функции автоматических измерений, переключений и сохранения результатов в режиме повторения измерений;
- высокое разрешение по расстоянию – 5 см (количество точек – 50000 на рефлектограмме);
- русифицированное меню.

Tomorrow's Technology, Today

Highest Performance, Functions, and Measuring Speed

- **45 dB** high dynamic range
- **8 m** short dead zone
- Simple measurement of **chromatic dispersion** from one end of optical fiber
- Measurement in **10 s** (Full-Auto mode), **0.15 s** real-time sweep
- Automatic execution of functions such as wavelength/channel switching, file saving, printing, etc., just by pressing Start key in **repeat measurement mode**
- **5 cm** high resolution, **50,000** sampling points
- **8.4 inch transparent type TFT-LCD** color display
- Optional 4 optical channel selector
- 6-hour battery life with remaining-power display
- Data read/write in Bellcore GR196 file format

Optical Loss Measurement

The high dynamic range and short dead zone of the MW9076B/B1/C permit accurate measurement of fiber loss and distance. And a new ASIC speeds up data measurement too.

High Dynamic Range

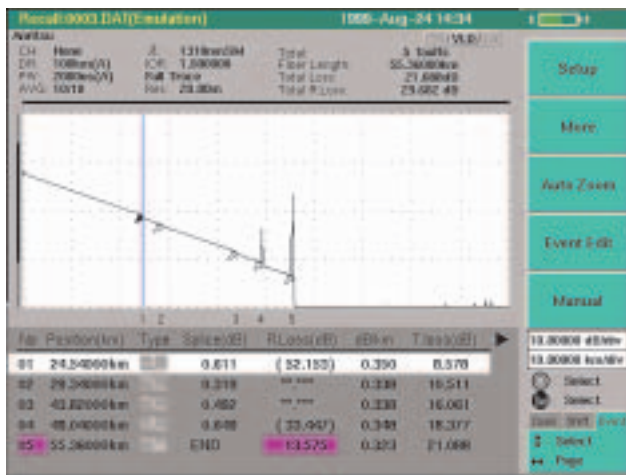

When using a wavelength of 1.55 μm (SM), a point about 190 km distant can be measured.

188 km optical fiber cable

High-Speed Measurement

It takes only 10 seconds to measure and display the waveform and connection loss on one screen. Just one press of the Start key is all that is needed to make measurement.

Short Dead Zone

Clearly measure up to near end by 8 m dead zone (back-scatter, SM unit)

Chromatic Dispersion Measurement

The MW9076D1 has a built-in function for measuring chromatic dispersion even outdoors. The chromatic dispersion can be measured automatically over a wide range from 1300 to 1660 nm from one end of the fiber. The dispersion reproducibility is $\pm 0.05 \text{ ps}/(\text{nm}\cdot\text{km})^*$ and the dynamic range is 30 dB.

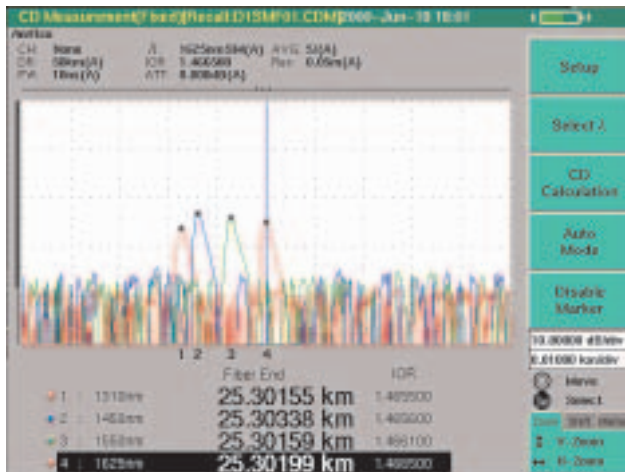

The MW9076D1 can be operated from an external PC using remote commands to measure the chromatic dispersion.

For detail of the chromatic dispersion measurement, refer to the document of "Product introduction MW9076 series Optical Time Domain Reflectometer."

* Measured with 25 km of 1.3 μm zero-dispersion fiber (ITU-T G.652) at 1550 nm.

● Fresnel Reflection

The far-end Fresnel reflection can be measured for four wavelengths (1310/1450/1550/1625 nm).

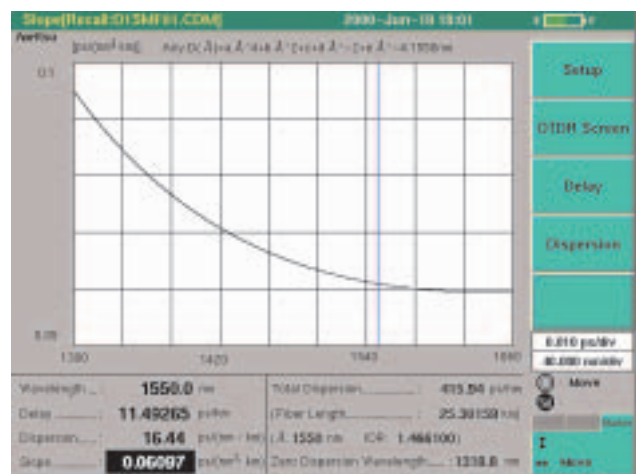

● Chromatic Dispersion Characteristics

The zero and total dispersion can be displayed along with the delay, dispersion and dispersion slope at 0.1 nm steps.

● Group Delay Characteristics

The fitting formula supports cubic or quartic Sellmeier, and polynomials can be applied to various types of fibers.

High-Speed Measurement

● Full Automatic Mode

Measurement results are displayed by simply pressing the Start key. All complicated settings of distance range, pulse width, attenuator, and marker can be automatically executed. Measurement speed in this mode was significantly increased. When the wavelengths are set to ALL, wavelengths are automatically changed.

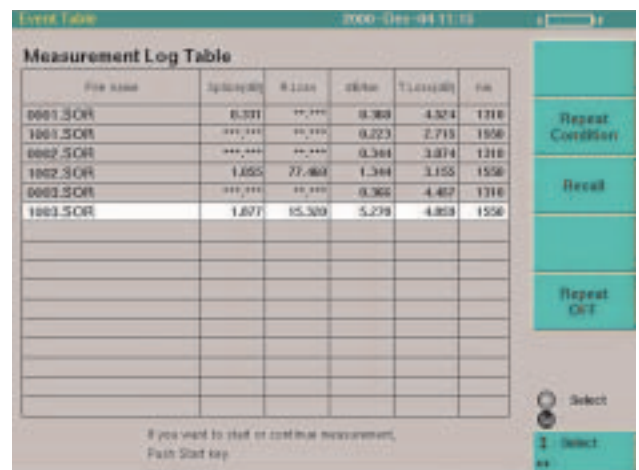

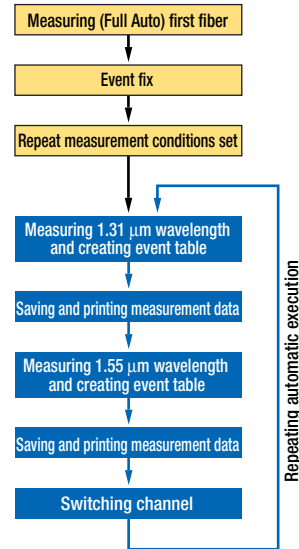

Event table

Event table (wavelength: ALL)

● Repeated Measurement

A series of operations, such as measurement, wavelength switching, data saving, optical channel switching, and next optical fiber measurement, can be executed automatically under preset measurement conditions. This mode is ideal for measuring a multi-core optical fiber.

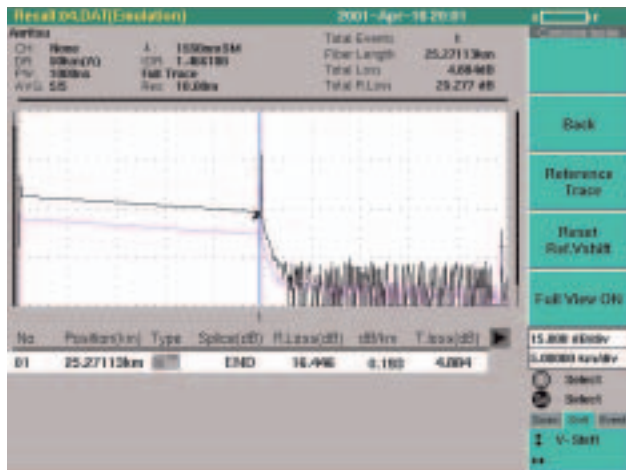

Repeat measurement log table

Various Useful Functions

● Waveform Comparison Function

Measured and saved data can be compared on the same screen. In addition, differences can be displayed as a waveform for simple observation of distance and level differences. This is useful for checking aging changes or comparing several fibers.

● Warning Level Setup Function

In automatic measurement mode, an event warning value can also be set in addition to a detection threshold value. For example, the threshold value can be set to the acceptance level, and warning value to a pass/rejection decision level. In this case, all events will be detected, and those exceeding the warning value are displayed in another color, therefore, enabling the operator to easily identify possible "borderline" events.

● Optical Channel Selector Control Function

In addition to using the built-in optical channel selector, external MN9662A/9664A Optical Channel Selector can be controlled via the RS-232C interface from an OTDR. By using these selectors, an optical fiber cable consisting of up to 32 cores can be measured automatically.

● Communication Light Check Function

When measuring a fiber in service, there is a possibility of mis-measurement by an OTDR. To guard against the risk of mis-measurement, this check function checks for the presence of light other than the OTDR optical measurement pulse.

● Visible LD

A 635 nm visible LD option is available for the detection of breaks and loss points along the fiber to be measured.

● VGA Output Terminal, Keyboard

The VGA connector outputs the screen interface to a CRT monitor, which is very useful for production-line applications.

● Large Internal Memory

About 18 MB internal memory is provided as standard. The following table shows the number of waveforms which can be saved in each media.

Media	GR196	Analysis
FDD (1.4 MB)	123	67
PC-ATA card (256 MB)	16000	10600
Internal memory (18 MB)	1560	860
Hard disk (1 GB)*	32700	32700

Number of data points: 5,000

*: The hard disk is for the PC card slot (IBM Microdrive DSCM-11000 + PC card adapter)

● Light Source, Power Meter

Optical fiber loss can be measured using the optical power meter function and light source function. Two types of optical power meters are supported: One is measurement range of -70 to $+3$ dBm (MW9076B/B1/C-02 option), the other is measurement range of -50 to $+23$ dBm (MW9076B/B1/C-03 option).

*Light source function is mounted on MW9076B/C as standard. Power meter function is optional to MW9076B/B1/C.

● Loss Table Display

The results measured with an optical power meter can be listed in a loss table for data comparison. Data in a loss table can be saved in text format.

MX907600A OTDR Emulation Software

The MX907600A is emulation software for the MW9076 series; it runs under Windows*, and is used to analyze data measured at fiber installation, maintenance and repair on a personal computer.

*Windows® 95, Windows® 98, Windows® Millennium Edition, Windows NT® Workstation 4.0, Windows® 2000 Professional, Windows® XP

● Emulation Function

Measured waveform data can be analyzed using a PC.

● Both-End Measurement Function

A new waveform can be composed by averaging data measured at both ends of an optical fiber.

● Data Transmission Function

Data files recorded by the MW9076 series can be transferred to a PC via the RS-232C port.

● Waveform Difference Display Function

When two wavelengths are chosen from waveforms read in the emulation mode, the difference between these two waveforms is displayed in another window, permitting easy comparison of aging changes in optical fibers.

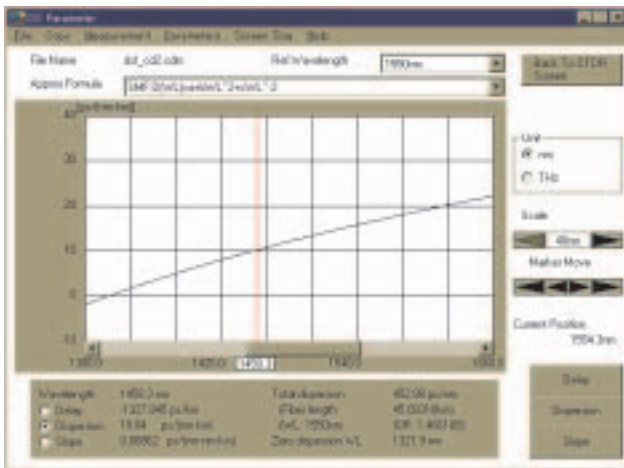

● Multi-Fiber Measurement Mode

This mode is useful for comparing and measuring several waveforms under the same conditions, such as when measuring a multi-fiber, or when measuring aging change in the same fiber. A maximum of 200 waveforms can be displayed simultaneously. The measurement mode, event/marker positions, event comments, IOR, and waveforms display positions can be changed for all waveforms as a group.

● Chromatic Dispersion Measurement Mode

This mode is used for chromatic dispersion measurements made by the MW9076D1. Chromatic dispersion measurements are performed by using slight differences in event positions for each waveform. The delay, chromatic dispersion, and dispersion slope can be obtained easily by selecting the dispersion approximation equation after the event position is set.

● Report Output

The event table of a specified file is analyzed and the printed automatically. It is also possible to print multiple waveforms on one page. In particular, at both ends measurement, the measurement results for both ends can be output automatically in a report. In addition, the report can be saved as the Excel file.

Note: This product outputs the pulse light of a high peak power.
 When this product is used in the state where it connected with transmission system, attach a wavelength filter or attenuator to Receiver of transmission system.
 There is a possibility of damaging Receiver of transmission system because of high power pulse of OTDR.

Power supply	10 to 26.4 Vdc 100 to 250 Vac (rated), 50/60 Hz, ≤50 VA max. (Specific AC adapter is used.) Battery: CGR-B/802D Lithium ion battery pack can be used. (Mounted in main frame)
Power	≤35 W
Dimensions and mass	290 (W) × 194 (H) × 45 (D) mm, ≤2.2 kg
Environmental conditions	Restricted by memory card specifications when a memory card is mounted. AC adapter: Depend on the conditions of AC adapter Operation temperature and humidity: -10° to +40°C, ≤85% (no condensation), +5° to +40°C, ≤80% (FDD is used.) Storage temperature and humidity: -20° to 60°C, ≤85% Vibration: Conform to MIL-T-28800E Class 3 Shock: 76 cm height, 6 surfaces, 8 corners*1 Dust proofing: Conform to MIL-T-28800E Drip proofing: Conform to MIL-T-28800E
EMC	Same as MW9076 series
LVD	Same as MW9076 series

*1: Dropped on the floor of plywood thickness 5 cm fixed by concrete

● Battery pack: CGR-B/802E

Battery	Lithium ion secondary battery
Voltage, capacity	14.4 V, 3440 mAh (49.53 Wh)
Continuous drive time	See the MW9076 series specifications
Charging time	≤3 h (Charge at the circumference temperature of 0° to 40°C)
Dimensions and mass	134.5 (W) × 89.5 (H) × 20.5 (D) mm, ≤420 g

● AC adapter: Z0695 (SA165A-2425V-3)

Rated AC input	100 to 240 Vac, 50/60 Hz
Rated DC output	24 Vdc, 2.5 A
Dimensions and mass	122 × 60 × 34 mm, ≤350 g
Safety specifications	UL, CSA, TÜV CB, CE, NORDIC, PSE
Environmental conditions	Operating temperature and humidity: 0° to +40°C, 80% Storage temperature and humidity: -20° to +80°C, 90%

● Visible LD: MW9076B/B1/C/D1/J/K-01

Central wavelength	635 ±15 nm (at 25°C)
Optical output	-3.0 ±1.5 dBm
Output optical fiber	10/125 μm, SM (ITU-T G.652)
Optical connector	FC, SC, ST, DIN, HMS-10/A *Replaceable
Optical safety	IEC 60825-1 Class 1M, 21CFR Class 2
Environmental conditions	Same as MW9076 series
EMC	Same as MW9076 series
LVD	Same as MW9076 series

Safety measures for laser products

This option complies with optical safety standards in Class 1M of the IEC 60825-1 and the FDA (21CFR1040.10, USA) in Class 2; the following descriptive labels are affixed to the product (FDA label is only affixed to product for export to the USA).

The maximum output is indicated under *1, and the wavelength under *2.

Caution: Do not look directly into the laser beam.

● Optical power meter: MW9076B/B1/C-02, MW0976B/B1/C-03

Applicable optical fiber	10/125 μm, SM (ITU-T G.652)
Optical connector	FC, SC, ST, DIN, HMS-10/A *Replaceable
Wavelength range	1.2 to 1.7 μm
Measurement range	Option 02: +3 to -70 dBm (continuous light) +0 to -73 dBm (modulated light) Option 03: +23 to -50 dBm (continuous light) +20 to -53 dBm (modulated light)
Measurement accuracy	Option 02: ±5% (-10 dBm, 1.31/1.55 μm, continuous light) Option 03: ±5% (-10 dBm, 1.31/1.55 μm, continuous light)
Return loss	≥36dB (1.55 ±0.02 μm)
Environmental conditions	Same as MW9076 series
EMC	Same as MW9076 series
LVD	Same as MW9076 series

● MU960001A Optical Channel Selector

Configuration	1 × 4
Wavelength range	1.2 to 1.65 μm (The specified wavelengths are 1.31/1.55 μm.)
Optical fiber	10/125 μm, SM (ITU-T G.652)
Optical connector	FC, SC, ST, DIN, HMS-10/A *Replaceable
Insertion loss	≤2.5 dB
Environmental conditions	Same as MW9076 series (not applicable to the shock)
Dimensions	290 (W) × 194 (H) × 47 (D) mm
Mass	≤1.5 kg
EMC	Same as MW9076 series
LVD	Same as MW9076 series

*: MU960001A can not be attached to MW9076D1.
